Initialization

Create User and login

1. **Open the Planning Poker Application:**
 - You will see the login screen with options to enter your username and password. If you do not have an account, click "Register user" to create one.
2. **Register a New User:**
 - Enter a desired username and password, then click "Register user". Follow any additional prompts to complete the registration.
3. **Login with an Existing User:**
 - Enter your username and password in the respective fields and click "Login" to access the application.

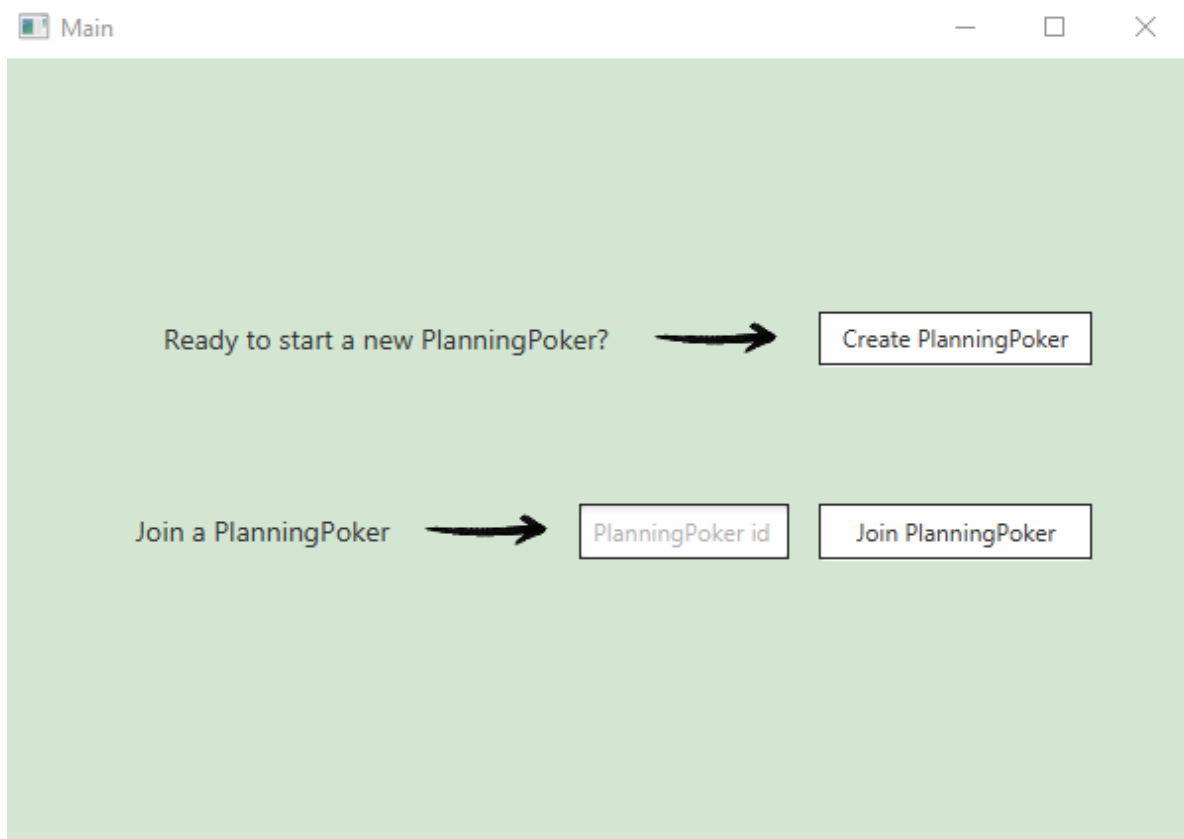

The screenshot shows a web application window titled "Login". The background is a solid light green color. In the center, the text "PlanningPoker" is displayed in a large, dark font, with the tagline "Precise estimation, better results" in a smaller, italicized font below it. At the bottom of the window, there are four rectangular input fields arranged horizontally. The first two fields are labeled "Username" and "Password" respectively. The last two fields are labeled "Login" and "Register user" respectively. The "Login" and "Register user" fields appear to be buttons or form elements for navigation.

Create a Planning Poker Game

1. **After Logging In:**
 - You will be directed to the main screen where you can start a new Planning Poker session.
2. **Start a New Session:**
 - Click on "Create PlanningPoker". You will automatically be assigned the role of Scrum Master.

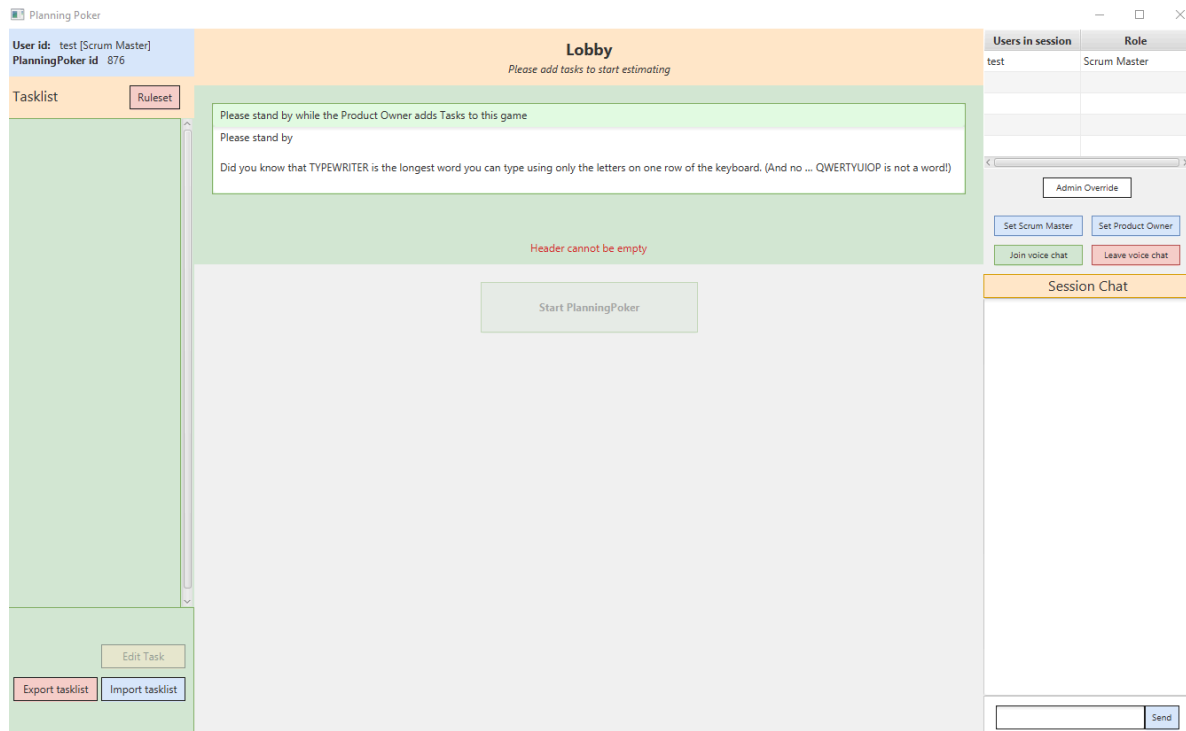

Join a Planning Poker Game

1. **Main Screen:**
 - If you want to join an existing Planning Poker session, enter the **PlanningPokerID** provided by the session host.
2. **Join Session:**
 - Click "Join PlanningPoker". The first user to join will be assigned the role of Product Owner, and subsequent users will be Developers.

PlanningPoker lobby

In the lobby, the Scrum Master waits for the Product Owner to add tasks to the game. The Product Owner can add, edit or delete tasks.

Chat in Written Form

1. Session Chat:

- Use the "Session Chat" window to communicate with other participants. Type your message and click "Send".

Voice chat

1. Voice Chat:

- Click "Join voice chat" to start a voice conversation with other participants.
- To leave the voice chat, click "Leave voice chat".

Import Planning Poker Task List

1. Import Tasks:

- Click "Import tasklist" to load a previously saved task list into the current session.

Create a New Task in the Game

1. **Add Task:**

- Product Owner clicks "Create task", enters the task header and description, and clicks "Save".

Edit a Task in the Game

1. **Edit Task:**

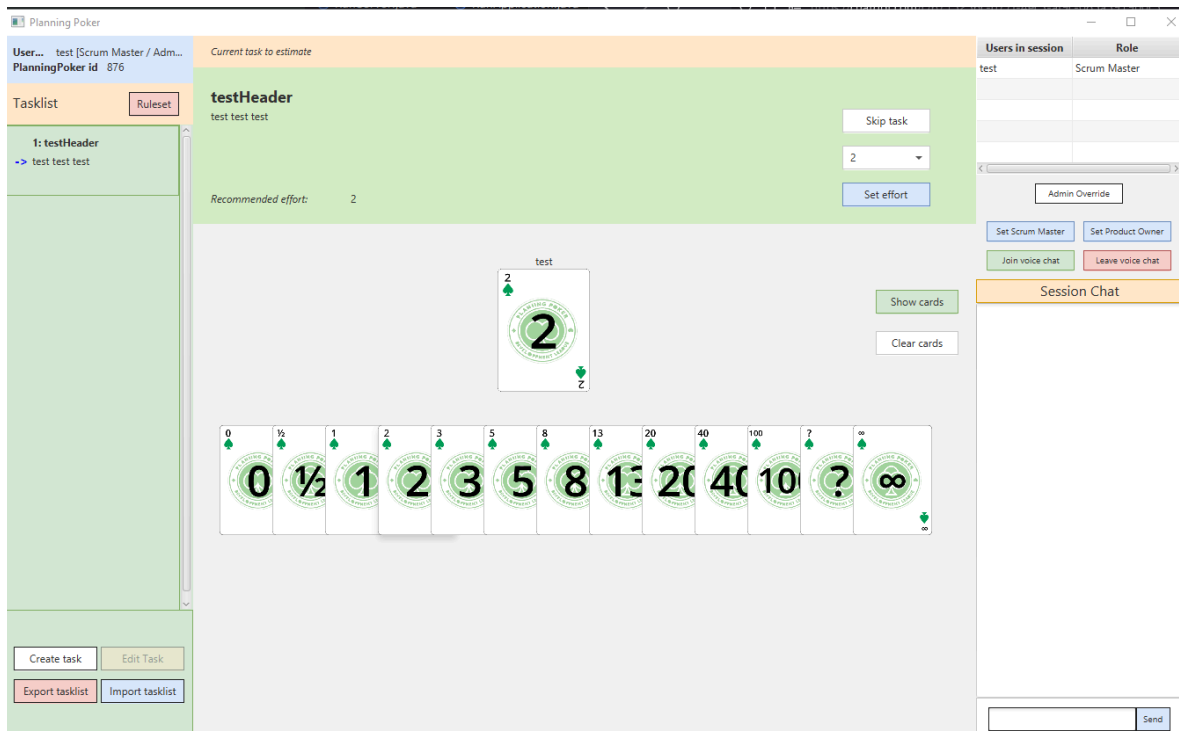

- Product Owner selects a task from the task list and clicks "Edit Task". Make the necessary changes and click "Save".

Delete a Task in the Game

1. **Delete Task:**

- Product Owner selects a task from the task list and clicks "Edit" and then "Delete".

PlanningPoker game

Start game

Once tasks are added, the Scrum Master can start the Planning Poker session, all connected players are now sent to the Game-stage

Overview of Planning Poker Game Flow

1. **Game-stage**
 - In the game-stage all users have a deck of possible efforts.
 - The chat, and voice chat are still open on the right
 - On the left are the tasks which are being estimated
2. **Start Estimating:**
 - The system provides the players with a task on the top of the screen, hereafter the players selects the card with the effort they believe matches the task.
3. **Reveal cards and discuss**
 - When the last player has placed his or her card, the countdown begins and the cards are flipped.
 - If all the cards are alike, hula girls will start dancing and the recommended effort will be sat

- If there are a large gap between the placed cards effort, ScrumMaster can click Clear cards, to clear the placed card and begin another round of estimation.
 - Whenever cards are shown, the system will provide a recommended effort based on the placed efforts.
4. **Set Effort:**
- The Scrum Master sets the final effort after team members have discussed and estimated the task, and have agreed upon a task effort.

Display Players' Efforts

1. **Show Efforts:**
- Scrum Master can display all players' efforts for the current task by clicking "Show cards".
 - After the last player has placed his or hers card, a countdown starts, and all cards are revealed after three seconds
 - If all the placed cards are alike, hula girls will dance, and the recommended effort be sat.

Skip a Task

1. **Skip Task:**
- Product Owner clicks "Skip task" to move to the next task without estimation.

Set Final Effort

1. **Set Final Effort:**
- Scrum Master sets the final effort for a task after all estimations are complete by selecting the value and clicking "Set effort".

Export Planning Poker Task List

1. **Export Tasks:**
- Click "Export tasklist" to save the current task list to your local machine.

Roles

There are three roles in PlanningPoker: Scrum Master, Product Owner and Developer. There is also a built-in admin.

Become Scrum Master

1. **Assign Roles:**

- The current Scrum Master can assign the Scrum Master role to another user by selecting the user and clicking "Set Scrum Master".

Become Product Owner

1. **Assign Roles:**

- The current Scrum Master can assign the Product Owner role to another user by selecting the user and clicking "Set Product Owner".

Assign Roles to Others

1. **Assign Roles:**

- The current Scrum Master can assign roles to other participants as needed.

Obtain Admin Privileges

1. **Login with Admin Code:**

- If you have an admin code, enter it during the login process. Admin users can perform all functions in the system.
